

Entering (updating) a Device Name (Fleet Identifier Number)

- 1) Download and Install the latest OZ-X Installer App.
- 2) Open the OZ-X Installer App, in the **Devices** section it will show a list of vehicles nearby. Press on the device (FLEET Number) which you wish to program. *The default Device Name is NLP200 if it's never been programmed. Note : The Vehicle or Trailer Needs to have power (IGN ON / and EBS connected if a Trailer) so you can connect to the device for programming.*

- 3) Press **Setup**, then press **Device**.
- 4) Press on the **Device Name** Field and type in or edit the device name (Fleet Identifier Number). Maximum 12 Characters. No Spaces.
- 5) Once entered, press the **Up Arrow** to save the Fleet ID / device name
- 6) You'll receive confirmation Configuration Succeeded. Press **OK**.
- 7) Press the **back** arrow to return to the Setup screen.
- 8) Press **Devices**, then press on the connected device (which will display the new Device Name entered/updated) to disconnect.
